1. Class/Seminar Teacher Evaluation

This survey requests your feedback on two separate aspects of your learning experience, split into three sections. The first section asks for your views on your teacher's class/seminar teaching. The second section asks for your views on the course as a whole at this point in time. Finally, the third section asks for some information about you, to aid analysis.

We recognise that this term has been particularly challenging for everyone due to the wider public health situation, with disruption experienced by both students and teaching staff. The School is continually striving to deliver the best possible educational experience despite these challenges and your views about your learning experience at LSE are a valuable source of information about this. The results will be used to help improve the teaching and learning experience for you and your peers and to identify good practice.

The School assumes that your response is broadly positive if you 'mostly agree' or 'definitely agree' with a statement.

1.1) Do the answers you supply below relate to the teacher from whom you have received the majority of your class/seminar teaching this term? The teacher's name, course title and group number (where relevant) are provided in the invitation email you have received for the survey.

- Amazing, kind teacher, very easy to approach, caring and understanding!
- As a younger teacher, I feel he was very helpful as he knows what it’s like to be a student recently.
- Helpul feedback given on assignments
- I like how he encourages participation from the class and runs through questions that people found difficult to consolidate our learning and clear up any problems. He is also happy to repeat things until we understand as a class
- The class experience was very good as he tended to involve everyone and explain well.
- The way he presents ideas and justifications during classes.
  He shows both analytical and intuitive approach.
  He always clarifies if I don't understand at the first attempt.

1.13) 1.7b Please comment below on aspects of this teacher's class/seminar teaching you think could be improved.

- Maybe make classes more interactive
- Sending out the notes made in classes would be quite helpful. In case, I haven’t fully copied them out
- Sometimes could be a bit clearer when explaining but overall a very good teacher.
- The pace of the class should be higher.

- Gives logical/intuitive explanations. Really tires to make you understand the logical behind concepts.
- Going over quiz questions in more detail.
  Talking through the graphs
- I always have a better understanding of the lecture material after this class. It is very helpful since we do not have much social interaction with the school in these times. The class teacher keeps us involved in the class.
- More solutions to the seminar problems.
- Very interactive, follow along with his drawing and explaining
- What was particularly helpful with my teacher's class is that we often reviewed the important aspects of the previous lectures before correcting quizz questions and class discussion questions. My teacher's explanations on how to draw and use graphs to answer questions was also helpful.
- going over lecture content (key concepts etc) in class

1.13) 1.7b Please comment below on aspects of this teacher's class/seminar teaching you think could be improved.

- Going over the discussion questions in more details and how to answer them in exam style would be helpful.

- Going in further detail in the models used, with explanation of consumer theory behind credit demand and explanation of Quantity theory of money.
- The classes are both interesting and informative. The recap at the beginning of each class ensures that we understand the material before tackling the discussion questions. The classes are fun and varied as we discuss the discussion questions through debates, working together on a google docs and also using on online platform to upvote our peers answers. Also going through exam style questions has made me feel more comfortable with the exam.
- The teacher thoroughly answers all questions and is happy to go over concepts again if people are confused.
- showing us how he would mark group answers
- willingness to frequently pause and answer questions, sharing pdf of notes at the end of class, implementing engaging activities using different media

1.13) 1.7b Please comment below on aspects of this teacher's class/seminar teaching you think could be improved.

- Concepts could be linked to more interesting real-world examples in order to make the subject interesting.
- Could be nice to get an answer when we ask questions whose answer imply a deeper understanding. Signpost the fact that they are non-examinable/extra-curricular but provide a brief answer.
- N/A
- he could maybe focus more on the quiz question

- Concise explanations and coherent knowledge.
- M. Naik is very, very good when it comes to take students into discussions.
- Really nice and friendly which makes it easy to ask for help. Always willing to rephrase something or explain it again and sets interesting group tasks
- The teacher helped a lot clarifying key concepts and giving feedback to our answers on questions. Really satisfied with the module that was made interesting by the teacher.
  He was always opened to improvements.
- in the classes concepts are explained very well and there are many opportunities to ask questions if needed. Helpful in understanding the theory.
- weekly recap. discussion question.

1.13) 1.7b Please comment below on aspects of this teacher's class/seminar teaching you think could be improved.

- Maybe more interactive things like padlet etc. as breakout rooms don't always work when the class is really quiet and most people don't engage
- Nothing
- exam technique, clarification on how marks are allocated and how to maximise your score. How to show that you understand a concept in a way that would get you full marks. what to include in an answer and what not to include. how to structure an answer. how to approach a question. how to know what it is that a marker wants from your answer based on the question.
